GPS Information

Tap the "GPS Info" button on the home screen to enter the GPS information screen, as shown in the following figure.

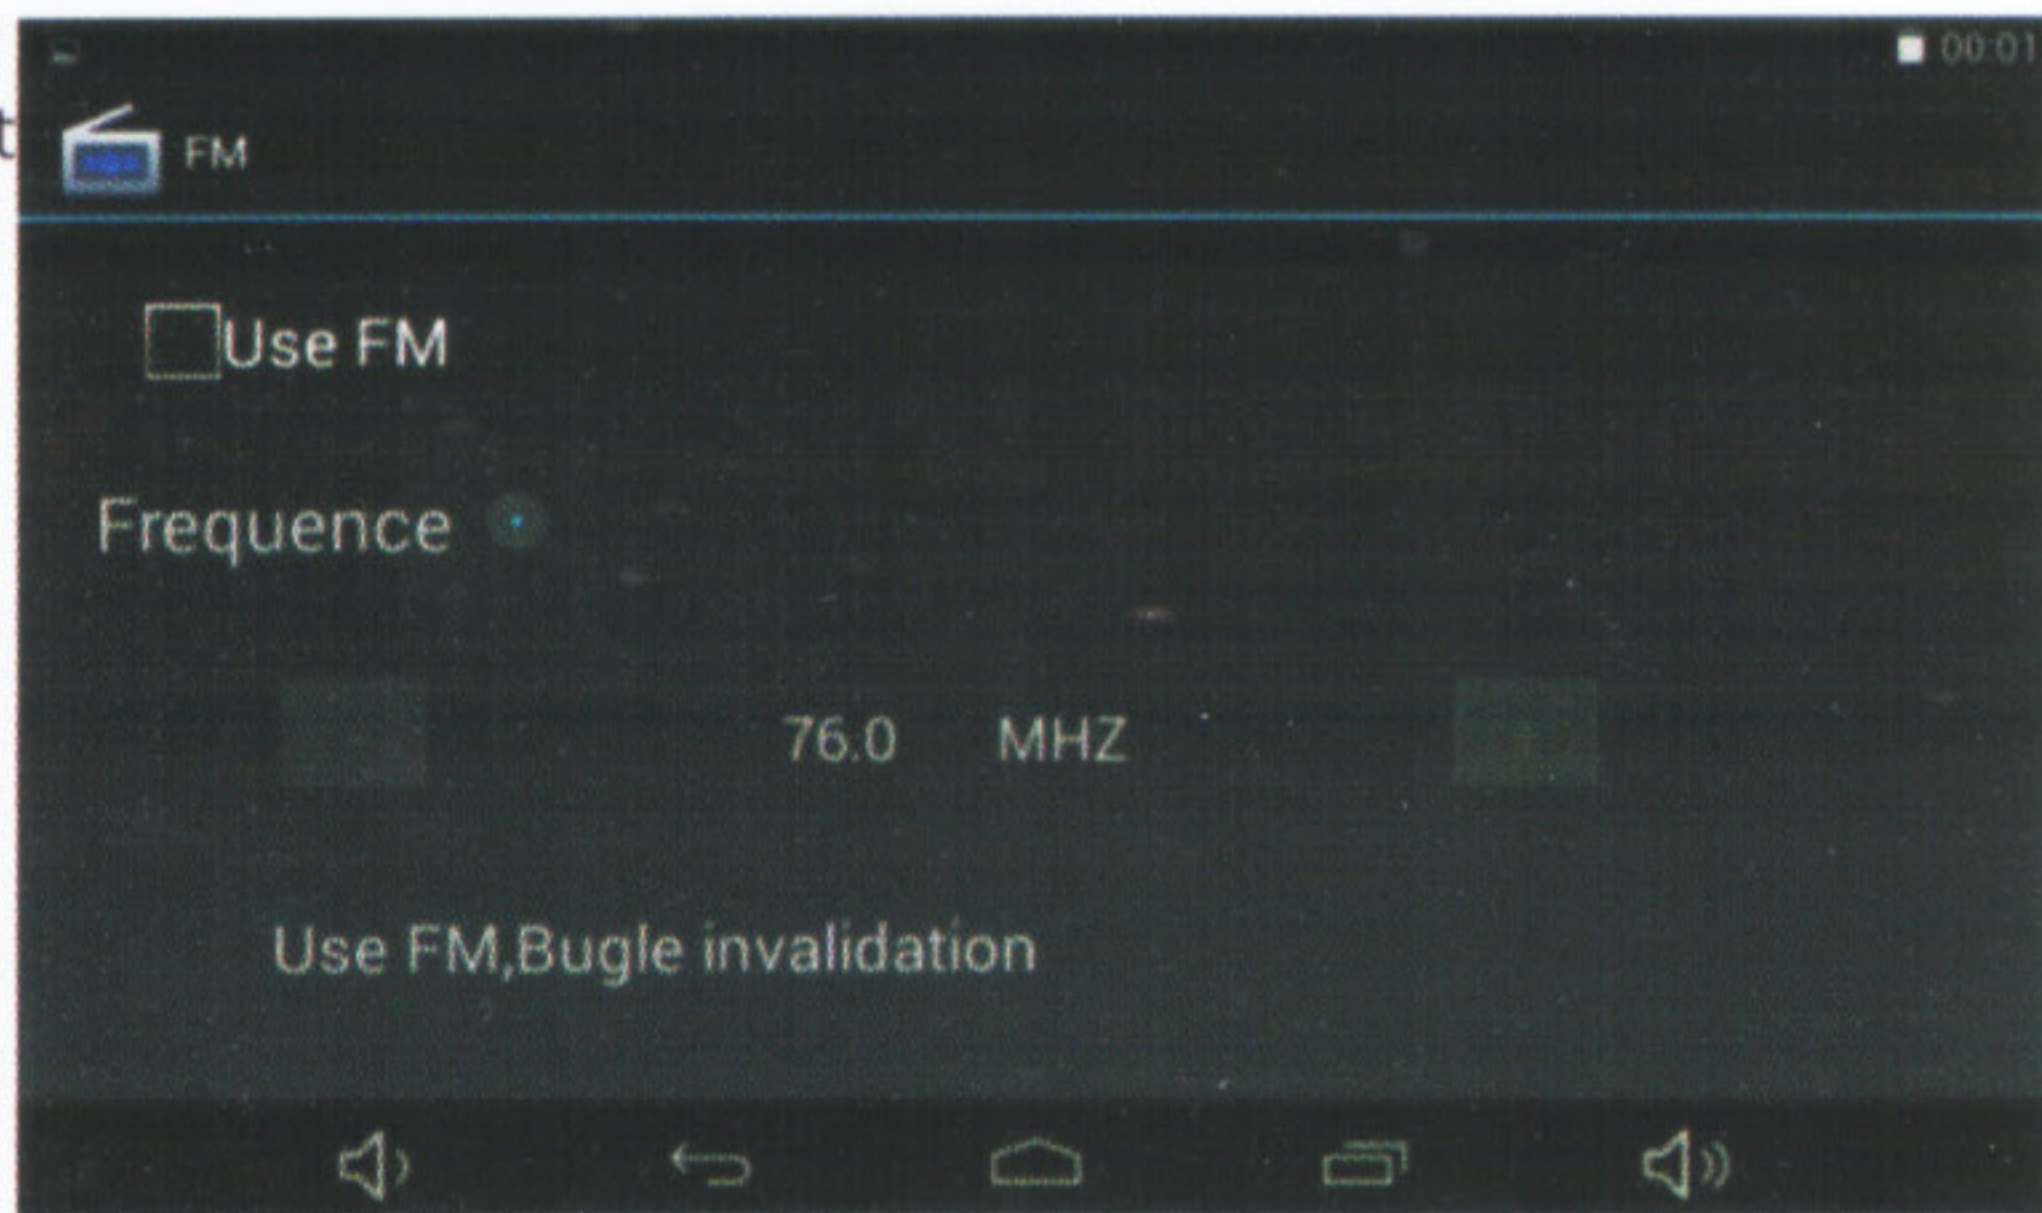

* To receive satellites signal and position as the right picture. The GPS should be at outside with a clear view of the sky.

FM Transmitter

Turn on your car's radio and select a station that has little or no signal reception,

Then tick "Use FM" to enable FM transmitter function. Program frequencies Set your transmitter to the matching station on your car's radio.

Turn on your MP3 player or other device and play a song. Turn the volume to half and raise the car's radio to the desired listening level.

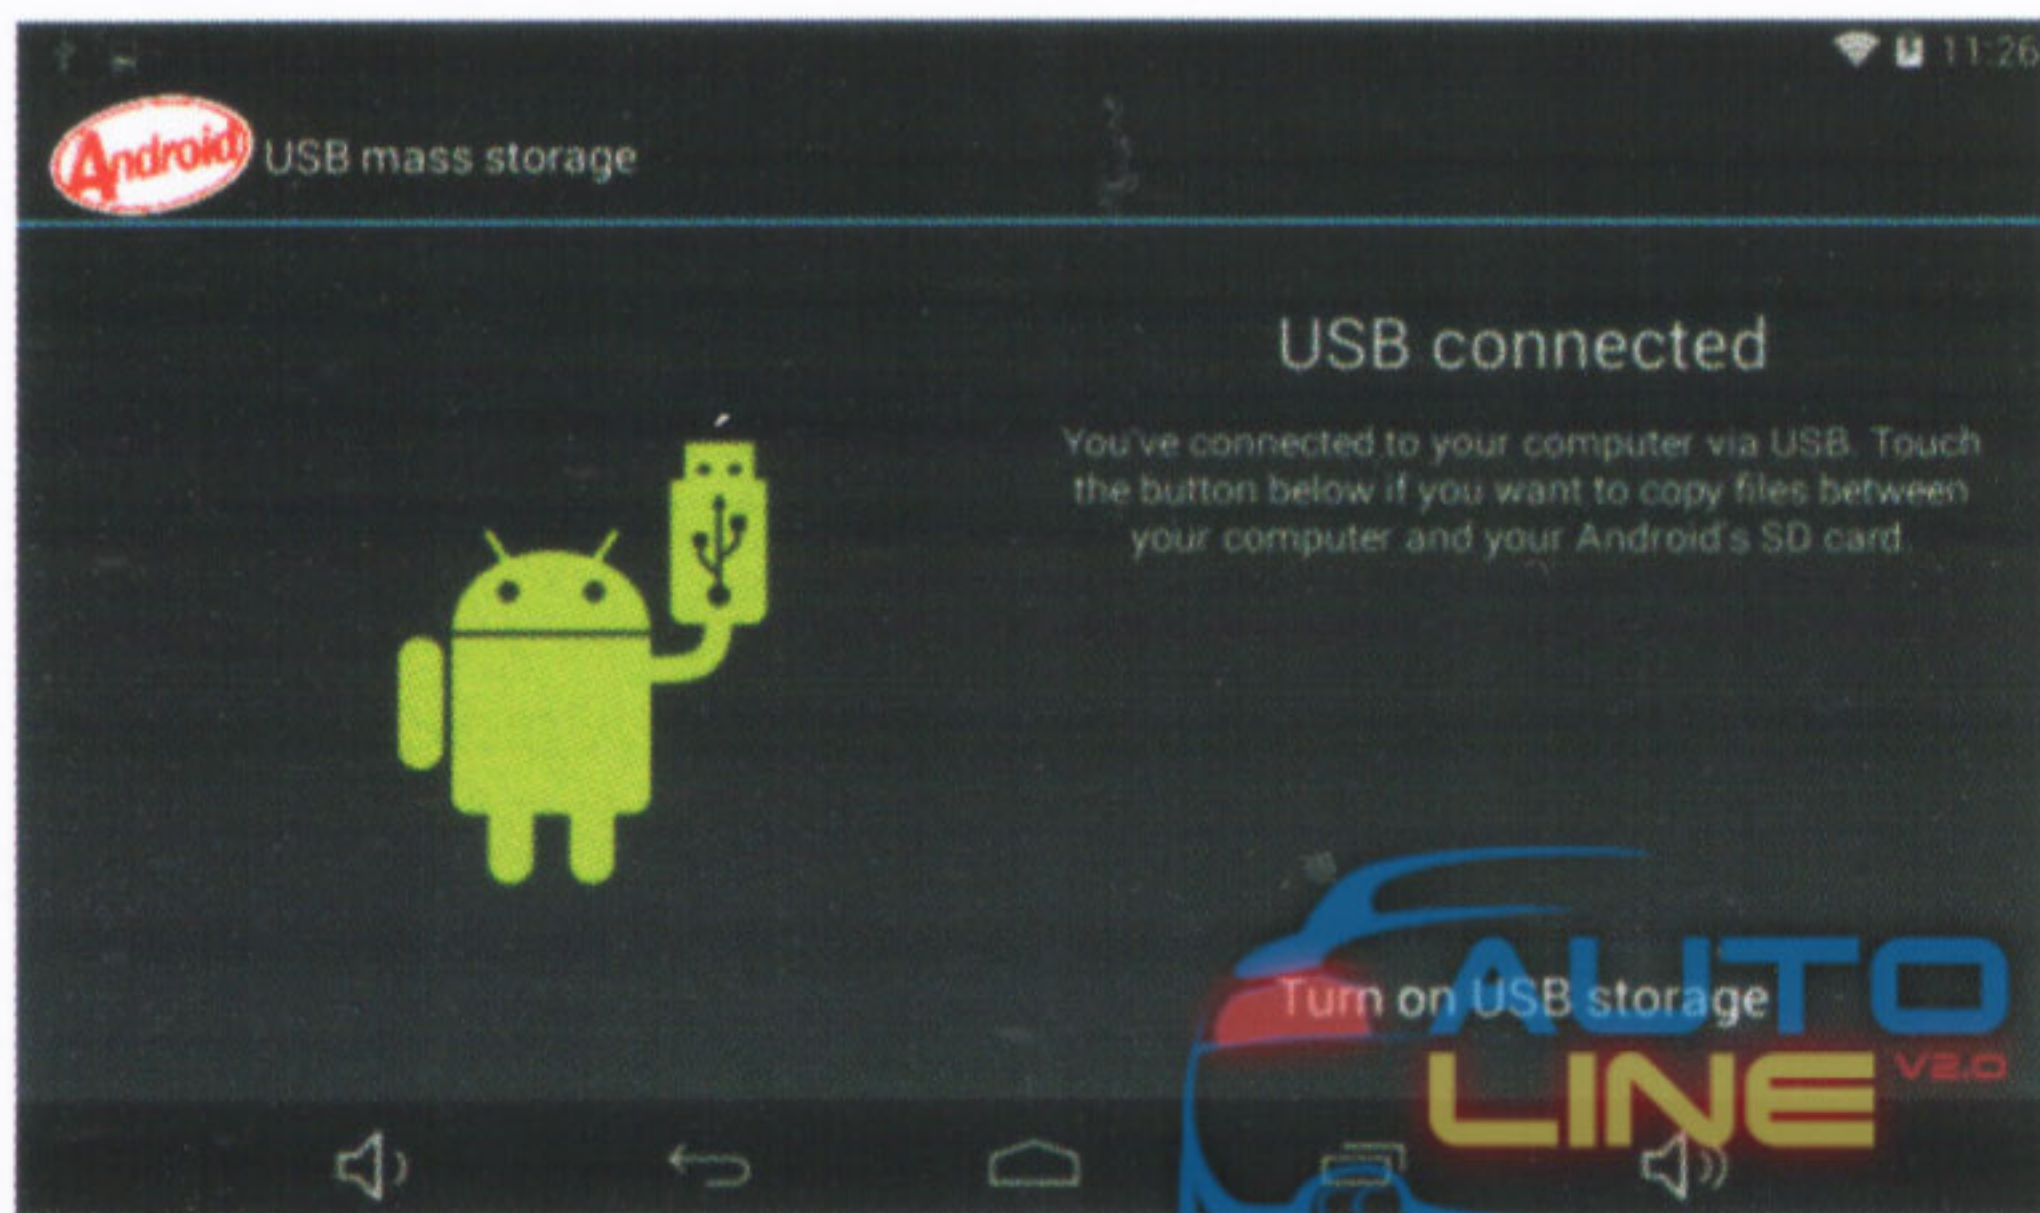

** If FM Transmitter is on, the GPS devices will be no sound.*

To let FM transmitter works, the GPS need connect to car charger.

Connection to a PC

Connecting the device to a PC, it will be used as a USB storage device.

Tap "Turn on USB storage" at the right corner to enable the USB storage function. The PC will then display two more disk drives. The first is the storage of the pad, and the second is a removable disk which can be opened only after a TF card has been installed.

Troubleshooting

Take steps described in the tables below to solve simple problems before contacting customer service.

Immediately turn off the device and disconnect the power adapter if the device is not working properly.

Users can't turn on the unit.

- Connect the adaptor correctly.
- Use the adaptor to supply power to charge the battery.

There is no sound.

- Turn up the volume or turn on the sound output.
- Turn off FM transmitter.

The unit cannot receive satellite signals or cannot orient.

- Make sure to use the unit out of room; If in the vehicle, you can use the external GPS antenna to solve this problem

The unit can receive signals now but cannot then; signals received are not stable.

- Use the adaptor to supply power or charge the battery.
- Remove the veil.
- Avoid great swing of the unit.
